

## **COVID-19 Worksite Specific Protocols**

Worksite: **University of Windsor – CEI MEMS Lab**

Updated: May 8, 2020

### **ADINE BUILDERS LIMITED COVID-19 PROTOCOL**

All items in the Adine Builders Limited COVID-19 Protocol will be adhered to for this worksite.

This includes guidelines for:

- Physical Distancing
- Site Access
- Worker Protection
- Enforcement

### **WORKSITE SPECIFIC REQUIREMENTS**

**Review the items below in conjunction with APPENDIX 1.**

#### **Worksite Entrances**

The University of Windsor has designated entrances V104A and V105 as the Dedicated Construction Entrances. Workers will only be allowed to use these entrances when entering or leaving the building.

#### **Washrooms**

The University of Windsor has designated Washroom W110 as the dedicated washroom for this project. All workers will be required to only use this washroom while on site. Access to other public washrooms will be off-limits

#### **Building Access**

Workers will only have access to the Worksite and Washroom W110 while in the building and must use the designated path when travelling between these locations. At all times physical distancing must be adhered to while on the travel path.

Access to other parts of the building including electrical rooms, data closets, service corridors, etc., will not be allowed. If access to any non-authorized area is required, a request must be submitted in writing to Adine Builders Limited and the University of Windsor for their review. If access is granted an amendment to this protocol will be issued detailing revised access conditions and requirements.

Any work that is required to be completed in a public area outside of the Worksite, including any public corridors, must be reviewed, and agreed upon by Adine Builders Limited and the University of Windsor prior to any work starting.
